Ability Level Continuum*

Use this guide to help provide insight to current and potential target skills and strengths. Mark the statements that best describes an individual's observable communication behaviors. You may not check all of the boxes in any skill area. You may also find that you check boxes in more than one Ability Level.

Ability Level	1: Emergent	Ability Level 2: Emergent Transitional		
Understanding	Limited or no understanding that symbols (e.g., pictures, words) represent ideas. Pictures may or may not help increase understanding and expression. Difficult to determine how much he/she understands verbally.	Understanding Responds to common gestures (e.g., come here, go away, greetings). Shows understanding of the use of common objects. Pictures seem to help increase both understanding and expression. May be starting to follow simple directions within familiar routines and activities.		
Expression	 May communicate most successfully using facial expression, body language, gestures, and/or behavior (either socially appropriate or challenging). May indicate acceptance (e.g., smile) or rejection (e.g., turn away) but does not reliably answer other yes/no questions. May desire or try to communicate in familiar and motivating activities. Requires help from communication partner to communicate successfully (e.g., narrowing choices, interpreting gestures/body language/behavior). Sensory behavior is very important for calming (e.g., rocking, mouthing objects) and determining likes and dislikes. 	Understands symbols (e.g., objects, pictures) for basic, common or concrete items. Starting to use clear and simple symbols (including objects, photographs and picture symbols) in motivating situations or favorite activities. If using picture symbols, he/she will use one picture at a time to communicate messages. May use gestures, body language, facial expression or behavior intentionally to communicate (e.g., pointing, showing, giving); however, reliability varies from day to day or activity to activity.		
Social Interaction	 Reacts to familiar people and/or motivating activities. Takes turns in familiar and motivating routines (e.g., "high five" or when someone spreads arms to receive a hug). May respond to close physical interaction by looking, smiling, or reaching. 	Social Interaction Shows clear preference for certain objects, activities, and people. May be starting to show some interest in social interactions, especially in specific situations. May not use symbols to interact socially.		
Literacy Skills	May not be interested in reading or book activities.	Literacy Skills May demonstrate a beginning interest in participating in shared reading and/or is beginning to engage with books more independently. May be able to identify own name and a few other frequently seen words.		
Other	Performance with forms of AAC may be inconsistent. Benefits from help from his/her communication partner as skills are developing.	Other Performance with forms of AAC may be inconsistent. Benefits from help from his/her communication partner as skills are developing.		

^{*}Adapted from Patricia Dowden, Ph.D., CCC-SLP, University of Washington, Communicative Independence Model.

Ability Level Continuum

Ability Level	3: Context-Dependent	Ability Level 4: Transitional Independent		
Understanding	 Understands photographs or picture symbols representing objects, common actions (e.g., run, paint, eat), people or situations. Starting to understand more abstract picture symbols (e.g., think, big, hot, few). Follows simple instructions in both familiar and unfamiliar routines. Understands and follows general conversations. 	Understanding Understands conversations as well as same age peers. Follows simple to complex directions given verbally.		
Expression	 Uses a combination of communication methods to express messages (e.g., gestures/ pointing, symbols, speech/vocalizations, and device). Uses symbols and objects spontaneously to communicate basic needs and make a variety of requests. Beginning to use symbols to comment and/or ask questions with support. Communicates best in routines, about familiar topics, and with familiar communication partners. Beginning to combine two or more symbols to create longer messages (e.g., uses carrier phrases "I want; I like; I see"). 	Expression Communicates about a broad range of topics with both familiar and unfamiliar communication partners. Consistently combines 2 or more symbols to create longer, more complex and/or an increased variety of messages for different communicative functions (e.g., comments, questions, or sharing information). Uses a wider variety of vocabulary or communication tools within his/her communication device.		
Social Interaction	 Initiates conversations and social interactions with familiar communication partners. Benefits from help to take additional turns in conversation. Answers routine questions appropriately with familiar communication partners. 	Social Interaction Uses socially appropriate comments/questions to initiate with familiar communication partners. Appropriately answers routine questions with a variety of communication partners.		
Literacy Skills	Literacy skills growing to include: identifying letters of the alphabet, connecting some letters with corresponding sounds, understanding word boundaries, reading a small number of high frequency sight words, reading and writing name, beginning to spell words but not necessarily with conventional spelling.	Literacy Skills Literacy skills growing to include: increased letter-sound awareness, additional sight words, conventional spelling of simple words; adding word endings as appropriate (e.g., past tense "ed", plural "s" or "ing), and solid understanding of the connection between spoken words and print. May be beginning to utilize word prediction with symbol support. Reads printed material that is somewhat below an age-appropriate level.		
Other	 May continue to benefit from the help of his/her communication partner to communicate successfully, especially when the topic, partner or environment is unfamiliar. Able to use simple strategies (e.g., repeat) to repair communication when not understood with support from the communication partner. 	Other Strong "mental mapping" of where things are in his/her device including navigational symbols. Able to use a variety of strategies to repair communication when not understood; and, in some cases, with the support of communication partners. Programs content in the communication device when it's desired or missing given support as needed (e.g., add favorite foods in Word List food category).		

Ability Level Continuum

Ability Level 5: Independent						
Understanding	Understands communication and directions the same as same-age peers.					
Expression	Combines single words, spelling and phrases together to communicate about avariety of subjects as others would at his/her age. Able to expand on a thought in conversation.					
Social Interaction	Social interaction skills, environments, and activities are similar to other of his/her age.					
Literacy Skills	Literacy abilities are on par with same-age peers.					
Other	Able to use various strategies to repair communication when he/she is not understood. Able to utilize rate enhancement features of the device (e.g., word prediction) though he/she may not choose to do so. Able to program desired content (e.g., personal narratives, etc.) into device.					

Notes: Additional observations of communication characteristics in each skill area such as strengths, barriers, other communication modes, etc.
Understanding
Expression
Social Interaction
Literacy Skills
Other: (e.g., environment, favorite communication partner/s, motivating activities/topics, behavior, etc.)

ABILITY LEVEL SUMMARY

In the chart below, mark the individual's Ability Level for each skill area to provide you with a "big picture" view.

SKILLS	ABILITY LEVEL					
	Emergent	Emergent Transitional	Context- Dependent	Transitional Independent	Independent	Notes:
